## Summary

---

As a UI/UX designer with 2 years of experience, I have a strong understanding of user-centric design principles and a passion for creating intuitive and engaging user experiences. I have experience working with a variety of design tools, including Adobe XD, Figma, and Miro, and am skilled at conducting user research, creating wireframes and prototypes, and collaborating with cross-functional teams to bring designs to life.

In my previous role, I worked on a variety of projects, including designing mobile and web applications, creating branding and visual identity systems, and enhancing user flows and interfaces for existing products. I am comfortable working in an agile environment and I enjoy using data and feedback to inform and iterate my designs.

Overall, I am a passionate and versatile designer with a solid foundation in UI/UX principles and a track record of delivering user-centric designs that drive business success.
